Natural Health: Speaking the Same Language Worldwide

Looking back on the nine years that we have had the privilege of using the Association of Natural Health to educate and effect change, I must say, it is the greatest, most satisfying feeling when you can help people find their way in the awesome network of natural health information we have built. We help people find their way to get better, and to live happier, healthier and more meaningful lives. What can be better than that?

At the Association of Natural Health, we are dedicated to promoting sustainable work, and freedom of choice in healthcare through good science and

good laws. We protect the right of natural health practitioners to practice and the right of consumers to choose the healthcare options they prefer. As always, AONH strives to achieve a broader, more accessible marketplace for natural products that will improve the quality of life for consumers worldwide.

Keeping natural products available to all

In many developing countries, a large proportion of the population relies on traditional practitioners and their armamentarium of medicinal plants to meet health care needs.

Although modern medicine may exist side-by-side with such traditional methods, natural medicines have often maintained their popularity for historical and cultural reasons. We know it's much more than that! They are effective, and without the side effects of their pharmaceutical counterparts. Such products have become more widely available commercially, espe-

Founder & President

James Hawver,
Co-Founder

cially in developed countries. In this modern setting, ingredients are sometimes marketed for uses that were never contemplated in the traditional healing systems from which they emerged. (Shaw,1998)

Market Research’s recently published study explores the global market for natural health supplements, projecting how the growing demand for natural health supplements will shape up in the years to come. The studies indicate that government funding of research and development of nutritional supplements will increase.

In my travels around the globe, I noticed the increase in consumption of natural-based ingredients in the health supplement industry, the use of natural health supplements as a preventive measure for lifestyle, and diseases. Increasingly different governments are also recognizing natural medicine and putting funding towards natural health research.

What we can do

AONH is willing to spend as many years as it needs, preparing ourselves to take natural health care to the world, to men and women who, without this effective secret, might have a miserable life.

We are willing to devote the time and attention in research, education and increasing of public awareness of natural health care. Through effective partnerships with other foundations, corporations and governments on the local, national, and international level, we will help people around the globe to learn how to become healthier, and to take control of their health through the valuable information provided.

We can help people around the world by creating conditions for everyone, every day, everywhere, to have equal chances and choices to live long, healthy and thriving lives.

Our beloved AONH was established to unify all natural health care modalities, institutions of higher learning, clinics, hospitals, manufacturers of natural herbal formulas, healthy restaurants and other institutions around the world.

The only way the international public and the natural health care industry can survive these attacks is to unite. With your commitment, we are going to keep up the good work we do. As the President of the Association of Natural Health I encourage you to speak to your friends, family and acquaintances, and encourage them to become members of the AONH so that we can affect even more change together.

Your AONH team (left to right): Admissions Manager, Geri Key, Co-Founder, James Hawver, Board Member, Dr. Abdel Alkhalouf, Founder, Sam Abukittah, Administrative Assistant Dinah Bowman, Publicity Director, Camille Carlson Gehrich, and Accounting Manager, Justin Murray.
